YEW ZHI HAO

Taiping, Perak Portfolio GitHub +(60)-11-1107-5923 yewzhihao3@gmail.com

Education

Degree **Universiti Tunku Abdul Rahman (Kampar)** **2020 –2025**

- **Major:** Bachelor of Information Systems (Honours) (Business Information Systems)

Skills

- **Languages**: Python, JavaScript, TypeScript, SQL, C#, HTML, CSS
- **Frameworks/Libraries**: Vue 3, Nuxt 3, Django, FastAPI, React, React Native
- **Databases/Tools**: MySQL, Redis, Git, Microsoft Excel
- **Data & Analytics:** Automation, Data Visualization, Data Mining, Data Analytics
- **Testing:** Basic Unit Testing

Experience

Apexnova (Junior Software Developer) **Nov 2025 – Apr 2026**

- Reduced CRM dashboard load time from approximately 20 seconds to 1–2 seconds (~90%) by restructuring data retrieval and optimizing Redis batch operations.
- Developed an automated transaction-data capture and validation workflow, reducing duplicate records by ~95% and integrating monitoring alerts.
- Reorganized transaction and customer data processing to support daily/monthly summaries and more consistent business reporting.
- Redesigned CRM V2 workflows and underlying database structures across frontend and backend components to streamline operational data access.

Vilor Berhad (Front-end web developer Intern) **Jan 2025 – Jun 2025**

- Improved admin and customer portal workflows through frontend enhancements, issue fixes, and usability updates using Vue 3, Nuxt 3, and TypeScript
- Supported the website upgrade from V2 to V3 and refactored frontend components, improving reported page loading performance by ~40%.

Projects

Trade Intelligence Platform
Python, Pandas, NumPy, SQLAlchemy, React, LLM API **GitHub**

- Built trade-data ETL workflows for spreadsheet imports, field mapping, record normalization, deduplication, and monthly reporting.
- Developed KPI dashboards covering year-over-year trends, buyer and country rankings, product performance, and data exports.
- Analyzed historical transaction data to segment buyers and identify repeat, dormant, and lookalike prospects, supported by AI-assisted research.

AI-Powered Business Document Intelligence Platform
FastAPI, Vue 3, TypeScript, Vision, Tesseract OCR, LLM API, Python **GitHub**

- Designed a mixed-file document intake and review workflow for spreadsheets, invoices, and receipts, with classification suggestions and per-file status tracking.
- Combined AI/OCR extraction with data validation, arithmetic checks, and human review to help users correct structured document data before confirmation.
