Education

Degree	Universiti Tunku Abdul Rahman (Kampar)	October 2020 – June 2025
• Major: Bachelor of Information Systems (Hons) • Programming Coursework: Data analyst, Web Development, Object-Oriented Programming with Java, Database Management Systems, Mobile Application Development, Systems Analysis and Design, Enterprise Systems Development, Pet Care Mobile Application		

Skills

- **Programming Languages:** Python, JavaScript, TypeScript, SQL, HTML, C#
- **Frameworks/Libraries:** React Native, React, Vue 3, Nuxt3, Django, FastAPI
- **Tools/Technologies:** Git, MySQL, MS Excel, CSS, Automation, Data Visualization, Data Mining, Redis
- **Other:** Data Analytics, Basic Unit Testing

Experience

Apexnova (Junior Software Developer)	Nov 2025 – Apr 2026
• Reduced page load time by ~90% (20s → 1–2s) by restructuring database and implementing Redis caching with a cache warming strategy in a Python-based web system. • Improved data processing accuracy and eliminated duplicate records by ~95% by developing an Android data extraction system using Kotlin and TypeScript (backend), applying keyword filtering and unique identifier (SBN keys) validation. • Enhanced data reliability and automation efficiency by ~40% by handling unstructured real-world data and optimizing processing workflows, integrating Telegram bots for daily logs and automated alerts on empty or failed notification outputs.	

Internship

Vilor Berhad (Front-end web developer Intern)	Jan 2025 – Jun 2025
• Developed and maintained admin & customer web portals to improve usability and business efficiency, using Vue 3, Nuxt 3, and TypeScript, applying code refactoring to reduce load times by 40% and improve stability by 35%. • Upgraded the official website from Version 2 to Version 3 for both admin and customer portals, enhancing UI/UX with responsive design and modern UX principles, resulting in a 60% increase in user interaction. • Debugged and resolved frontend issues to ensure seamless customer experience, boosting platform reliability by 35%.	

Projects

Pet Care Mobile Application (Final Year Project) (Here)	
• Built a centralized pet care platform that streamlined fragmented services (grooming, vet care, hotels, taxis, e-commerce), enhancing user convenience by eliminating the need for multiple apps, using React Native, React, FastAPI, and MySQL. • Delivered a pet management module (profiles, diary, care tips) to help owners track health history and milestones, improving long-term pet well-being. • Achieved cross-platform deployment on iOS & Android from a single codebase, reducing maintenance overhead with React Native. • Implemented a scalable full-stack architecture by integrating React (web UI), FastAPI (backend), and MySQL (database), ensuring secure and performant operations.
